

Increase Access and Retention in Care	Screening, Testing and Vaccinations (normalize testing)	Make Care Easy	Diversify Outreach	Coordinated Support for Those Erratically In-Care	Promote Healthy Sexual Conversations/ Normalize Healthy Sexual Behavior	Health Literacy Good Education=Good Health Care	Good Housing-Good Healthcare	Adapt Covid Successes to HIV
Expand access and eligibility to RW care to 500% to match VT, ME and Mass.	Annual screening at points of health care entry	Feel that going forward in the years to come technology will have advanced so therefore there will be a new normal coming forth	Expanded condom distribution	Coordinate list of all patients out of care	Increased education	PrEP education with health curricula	Supportive housing for HIV elderly	Condoms like masks - mask fatigue is like condom fatigue
Expanded housing and social services for PLWH	Vaccinations	Free health care with no paperwork	Build a core of community peer outreach workers	Community system to get/keep people in care	Eliminate institutional racism/poverty/stigma	Include a required health education component about PrEP and recent legislative updates	Housing for HIV youth	Vaccine development timeframe
Test and identify new Dx.	I also think about the successes (at least in my neighborhood) of Covid testing and use that for HIV testing. I can schedule within the day, the test takes less than 90 seconds and I get results within a day. This would be awesome for HIV testing. Quick.	Address the small things that create barriers to care	Syringe exchanges	Treatment as prevention	Free HIV of stigma (internal and external)			
Rapid starts	Testing at annual blood work		Free medications		Promote use of condoms like masks			
Housing	Increased testing		Outreach vans to do labs and treat		Blast old and new social media: Radio, billboards, TV local pharmacies. Provide grant money to churches to allow educational programming in their doors			
Treatment as prevention	Outreach vans - test, test, test!		Self testing		Signs that decrease stigma (agency signage)			
	Opt-out testing in all medical settings				Increase signage			
	I think about the success of mother-to-child transmission and use that as a model				Right to be whatever identity you are!
