

Prevention, Testing and PrEP	Community Outreach and Education	Addressing Institutional Barriers / Educating on Barriers	Funding and Resources	Addressing Stigma
More HIV Testing	Interactive community events with testing and education - fun ways to gather - increasing testing, awareness and reducing stigma	Ensuring that basic psychological and self-fulfillment needs are met	Easy accessible and culturally competent healthcare	Gender, race and socioeconomic inclusivity in media, institutions and society
Increase access to testing	Connecting with the Trans community	Ability to use not-yet-approved testing methods (anal swabs) that CT won't fund/allow to be used	Universal healthcare	Campaign to address stigma: HIV is not a gay disease and U=U
Regular Testing	Better scripts/descriptions on talking about HIV as an STI	Universal health care	Funding and resources	Stigma and discrimination campaign using people with HIV
Have HIV be televised - testing, discussions, education	Build community with acceptance	Accessible and affordable housing	More non-restrictive funding for CBOs	Providers that "look like me" and are empathetic
Universal free testing wherever you receive care	Community engagement with teachers, clergy, elected people, etc.	Truth and reconciliation on racism in the medical industrial complex	Expand service hours for all services - including evenings	Trauma-informed care has an impact on retention in care
Free universal PrEP and related care	Getting into black and Latino communities	Educate all medical and care providers on PrEP and HIV	Funding for HIV care and prevention workers to draw top talent	Updating HIV education to focus on eliminating stigma and fear
Reducing bureaucratic barriers to PrEP	Increase access to HIV information through online platforms (apps)		Resources for fostering dignity for all (housing, mental health, substance use, etc.	Prevention without stigma
Comprehensive sex histories	Increase awareness of HIV			Ending stigma and shame for LGBTQ and others at risk
Free and accessible PrEP	Increased education to the public			
PrEP social marketing campaign statewide	Community conversations on HIV			
Routine testing for STIs to include HIV				

Science-Based Interventions - Focused on a Cure	Schools	Enhancing Communication and Media	Collaborations	Data
Development of an HIV vaccine	HIV education in middle and high schools	Newsletter for consumers via text - simple bullet points	Cross-collaboration and info sharing between like-minded organizations	Better use of technology and coordinated data (data to care)
Listening to science	Schools reach younger people	More easy-to-access community events for consumers	Enhanced connection between agencies statewide to facilitate service delivery	
U=U education, exposure, and normalization	Remove parental barriers	Addressing literacy and the digital divide	HIV positive leaders of community organizations coming together - building on their collaborations to work with other localities	
More funding and research, focus on finding a cure	Starting education earlier - make it better and accessible			
Where's OUR vaccine?	Sex education mandatory across the board, from puberty			
Develop a vaccine
